Vagaro (Salon and Spa Management Platform)
www.vagaro.com

➔ Vagaro is a platform providing comprehensive tools for appointment scheduling, point-of-sale, and marketing in the beauty and wellness industry.
➔ Worked in key features:
  ◆ Appointment Scheduling
  ◆ Point of Sale
  ◆ Marketing Tools
  ◆ Customer Management
  ◆ Integrations of backend APIs and 3rd party APIs (Zen-Swipe for payment integration)

➔ **Responsibilities -**
  ◆ Developed and maintained responsive and cross-browser compatible user interfaces using HTML, Sass, ReactJS, and JavaScript,, ensuring optimal user experiences across various devices.
  ◆ Implemented Sass for modular and scalable stylesheets, streamlining the styling process and enhancing code maintainability.
  ◆ Collaborated with cross-functional teams to design and implement features, leveraging ReactJS and JavaScript , to create dynamic and interactive components for the website.
  ◆ Utilised HTML5 semantic elements to structure web content, promoting accessibility and search engine optimization best practices.
  ◆ Integrated Javascript and for type-safe development, enhancing code quality, and catching potential errors during the development phase.
  ◆ Worked on role-based access control, implementing and maintaining user privileges within the application for enhanced security.
  ◆ Conducted API testing using tools like Postman to validate and optimise the functionality and reliability of implemented APIs.
  ◆ Contributed to a streamlined and efficient build process using npm and yarn, managing project dependencies and ensuring a smooth development workflow.
  ◆ Collaborated in a team of 15 developers, participating in code reviews, providing constructive feedback, and adhering to best practices for HTML, Sass, ReactJS, and development.
  ◆ Stayed updated on industry trends and emerging technologies, integrating new tools and techniques to enhance the overall development process.

➔ Played a pivotal role in ensuring the seamless deployment of the Vagaro platform.
➔ Executed comprehensive quality assurance for the Vagaro platform, Applied rigorous testing methodologies post-deployment, swiftly identifying and resolving issues to ensure optimal system functionality

➔ **Role:** Software Engineer
➔ **Tech stack: ReactJs, Javascript, , MongoDB, MySql, Bootstrap, Sass**

Modules i have worked in for vagaro

- **Transaction List**
  - Development of the "Transaction List" module within the Vagaro platform, offering a robust reporting system that provides detailed insights into customer checkouts and purchase history.
  - Collaborate cross-functionally to enhance features, resolve issues, and continuously improve the module's functionality.
  - Contributing to a comprehensive and streamlined transaction reporting system.
  - **Worked with team of 10+ developers**

- **Website Builder**
  - development of the "Website Builder" module, an intuitive and user-centric solution empowering Vagaro platform consumers, including salon and fitness centre owners, to effortlessly craft and customise their websites.
  - Collaborated closely with end-users to understand their needs, resulting in a user-friendly and accessible platform for website creation. Integrated the "Website Builder" seamlessly into the Vagaro platform.
  - **Worked with team of 15+ developers**
